

## **VMware/Cloud administrator**

### **SUMMARY OF POSITION**

Banner Quality Management Inc. is seeking a VMware/Cloud administrator to play a strategic role in implementing and supporting a hybrid cloud solution at the NASA Glenn Research Center in Cleveland Ohio. The successful candidate will have a solid understanding of the design, maintenance and support of a VMware private cloud environment coupled with a strong background in implementing Amazon Web Services (AWS).

### **Essential Duties and Responsibilities**

Provide support with design, implementation, and maintenance of the VMware environment. Deploy and manage AWS solutions to include compute, storage, archive and backup and services. This will include day-to-day operational support of the existing VMware virtualized systems and infrastructure and the design and establishment of a Hybrid/Cloud architecture.

### **Essential skills:**

- The candidate must have solid System Administration skills in VMware, AWS, and Windows Server.
- Good working knowledge of iSCSI, and Fiber Channel protocols including network switching, and zoning.
- Microsoft PowerShell, vSphere PowerCLI, or comparable scripting experience is also required.
- Experience with VMware's vRealize Suite of products. (i.e. Operations and Automation is a plus).
- Experience with of vSAN and/or VMware Cloud is a plus.

### **Personality or self-management skills:**

- Strong communication, written and verbal, analytical and problem-solving skills are a must.
- Candidate must have strong team work qualities with the ability to establish and maintain solid working relationships with peers, customers and management.
- Looking for a self-starter with the ability to work independently as well as in a team environment.

### **EDUCATION/EXPERIENCE**

- Must have a minimum 3 years of experience working with VMware ESX/ESXi environments and a minimum of 1 year working with AWS cloud production services.
- A solid understanding of implementing hardware infrastructure that includes servers, networking, and storage components (SAN, NAS).
- Proven experience with supporting highly available and scalable services in both private and public clouds.
- Bachelors or Master's degree in a directly related field.

- A combination of education, training, or certification that provides the requisite knowledge, skills, and abilities may be substituted for the degree.
- VMware Certified Professional (VCP) and AWS Certified Solution Architect Professional,) certifications are a plus.

**To apply please submit a current resume and cover letter to:**
